

## BC1 Automation Controller

The BC1 Automation Controller is a powerful new addition to the BitWise Controls platform. Featuring expanded hardware interfaces and powerful new automation features, the BC1 can be the primary controller for any installation, and can co-exist with additional BC1 and BC4 controllers. The BC1 combines the power and flexibility of user scripting with the simplicity of drag and drop programming.

### Features:

- 8-routed, adjustable IR ports
- On-board IR library and learner
- 4-RS232 ports
- 4- SPDT Relays
- 4-General Purpose IO ports
- Multiple simultaneous TCP client connections
- Powerful scheduling and automation functionality
- Remotely triggered events via Voice & SMS Text
