

C841 Ceiling LCR Speaker

A super-stiff, 8-inch graphite woofer gives the C841 an especially natural—yet powerful—sound. The woofer and tweeter are angled 15 degrees, allowing you to put the speaker in the ceiling up by the screen while directing the sound at the listeners. You can even pivot the tweeter to get it aimed just right.

Sweet sound from above

The C841 gives you the great sound of graphite in a hideaway home theater speaker. Its 8-inch graphite woofer has an incredibly stiff cone for low distortion and powerful bass all the way down to 40 Hz. Our sophisticated 1-inch silk dome tweeter blends perfectly with the woofer, delivering clear, sweet highs to complement the powerful lows.

Extremely high sensitivity of 92 dB and power handling of 150 watts assure you can use the C841 with any amplifier or receiver, no matter how large or small. The C841 is one speaker that fits practically any room, any system, any budget and any taste. Crank up the C841 and you will definitely like what you hear! Includes Thin-Bezel Grilles held by Neo Magnets.
