

C626 Ceiling Speaker

The C626 is a great mid-priced ceiling speaker, blending the high output of a graphite woofer with the smooth, sweet sound of a silk-dome tweeter. High sensitivity and excellent power handling make the C626 a superb choice for practically any room in the house, but especially for rooms where you want the best sound.

Step up to great graphite sound

The C626 features one of our very best woofers, a 6½-inch model with a graphite-impregnated cone that's stiffer than paper or polypropylene. You get clearer sound with lower distortion, all the way down to 45 Hz! A sweet-sounding, pivoting 1-inch silk-dome tweeter perfectly complements the graphite woofer's refined sound. It's the ideal ceiling speaker for situations that demand affordable high performance.

To make the C626 easy to drive for any amplifier, we gave it a forgiving 8-ohm impedance. We also gave it a sensitivity of 91 dB, so you can run it at high volumes even with a low-powered amplifier. It uses the same quick, sturdy mounting system and cutout template as our other 6½-inch models, too. Includes Thin-Bezel Grilles held by Neo Magnets.

Specifications

• 6½" Graphite Woofers	• Impedance: 8Ω
• 1" Pivoting Silk Dome Tweeters	• Sensitivity: 91dB 1W/1m
• Power Handling: 100 Watts	• Diameter x Depth: 9¼" x 4"
• Frequency Response: 45Hz - 20kHz	• Ceiling Cut Out: 8¼"
• Replaces C625 Ceiling Speakers	• Thin-Bezel Grilles held by Neo Magnets
