

## C606 Ceiling Speaker

The C606 is our most affordable 6½-inch ceiling speaker. It's a perfect choice for applications where good sound is desired but cost is a major factor. The C606 offers a great combination of sound quality and ease of installation. High sensitivity makes the C606 easy for any amplifier to drive.

### Bigger bass, smaller price

You'll be amazed when you hear how much sound our most affordable 6½-inch ceiling speaker puts out. Its sturdy polypropylene woofer is the same type found in many high-quality bookshelf speakers. And its ¾-inch soft-dome tweeter sounds surprisingly sweet—no surprise when you learn it was engineered by the same team that designed our top in-wall, on-wall and bookshelf speakers.

The C606's 90 dB sensitivity delivers high output even with low-powered multiroom audio amplifiers, so you can get the same volume with about half the power. The C606's forgiving 8-ohm impedance makes it easy to drive with any amplifier. It also fits into the same cutout as all of our other 6½-inch ceiling speakers do, so it's easy to install. Includes Thin-Bezel Grilles held by Neo Magnets.

### Specifications

|                                    |   |
|------------------------------------|---|
| • 6½" Polypropylene Woofers        | • Impedance: 8Ω                                   |
| • ¾" Soft Dome Tweeters            | • Sensitivity: 90dB 1W/1m                         |
| • Power Handling: 75 Watts         | • Diameter x Depth: 9¼" x 3-5/8"                  |
