

# Bullet Train

# USB 3.1 EXTENSION HUB

featuring  CLEERLINE SSF™

USB Extension is simplified with this cable from Bullet Train. It has USB-A on one end and a full USB 3.1 USB HUB that can manage both USB 3.1, 3.0 & 2.0 connections at the same time. Made to work with video conferencing software like Zoom and Teams, this device can connect 4 USB cameras to your conferencing software through one single USB connection.

## WHAT CAN THIS DEVICE DO?

### Manage Four USB-C 4K Cameras

Now you can send actual 4K signals from any of your conference room cameras into your conferencing system. Place your cameras up to 40 Meters away from the connected codec or computer.

### USB-C Data Transfer

Hard drives, printers and other USB driven devices that work alongside computers are all able to be extended away from the computer with this cable, with the Hub you can connect 4 devices at the same time.

### Power the Hub for 3.1

When using the USB Hub without plugging it in you have a fully functional USB 2.0 hub. When you add power through the micro USB port, you get a full 4 port USB 3.1 Hub.

## KEY FEATURES

- USB 3.1 GEN 1 SUPPORT
- 4 PORT USB HUB
- 5 GBPS DATA RATES
- BUILT WITH CLEERLINE SSF FIBER OPTICS
- CL2/CL3 IN-WALL RATING
- UP TO 40 METERS
- NO POWER REQUIRED

## PRODUCT NUMBERS/LENGTHS
