

# Bullet Train AOC ADVANTAGE

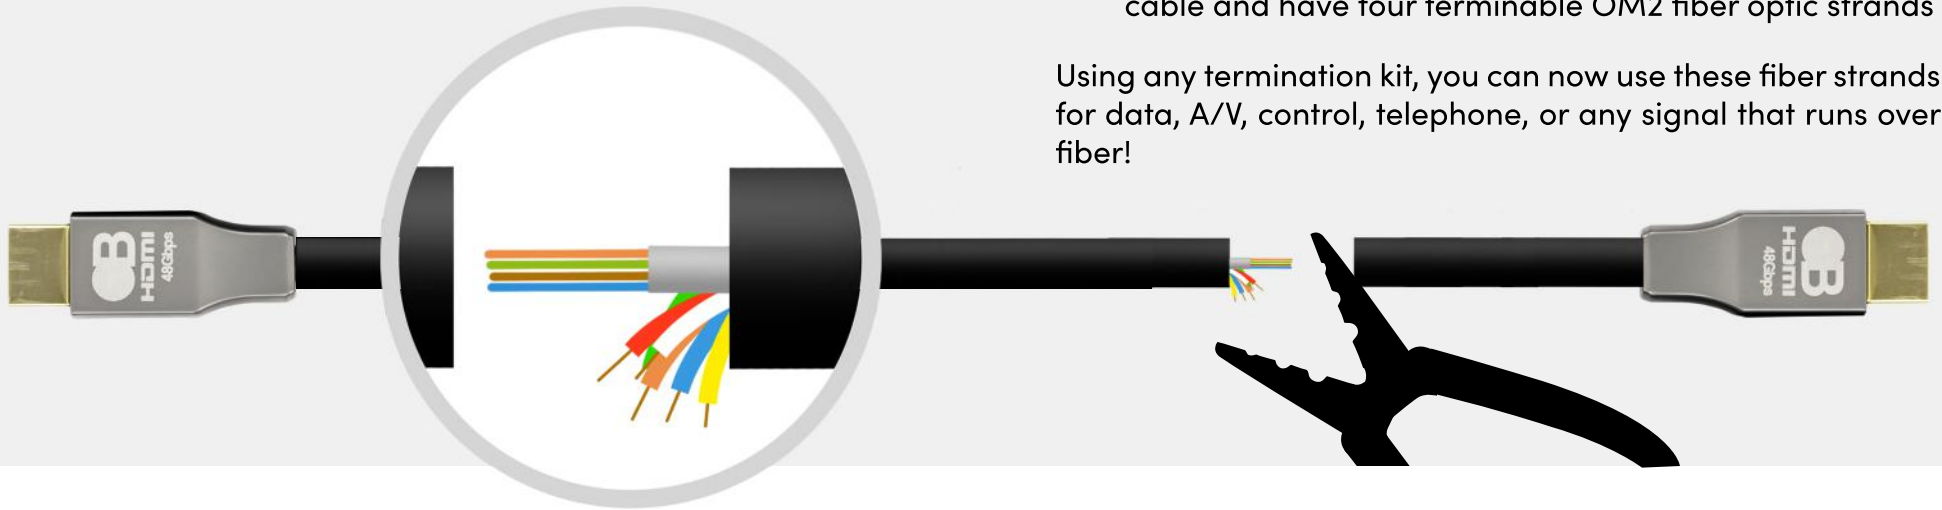

Once you have a Bullet Train AOC cable, you also have four Cleerline SSF Fiber Optic strands. This fiber is ready for over 100Gbps, and you can terminate it when HDMI technology becomes outdated!

Step 1: Run cable

Step 2: Use cable for years

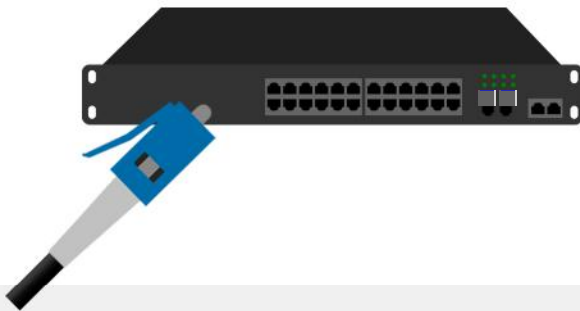

Step 3: Ten years down the line, cut off the end of the cable and have four terminable OM2 fiber optic strands

Using any termination kit, you can now use these fiber strands for data, A/V, control, telephone, or any signal that runs over fiber!

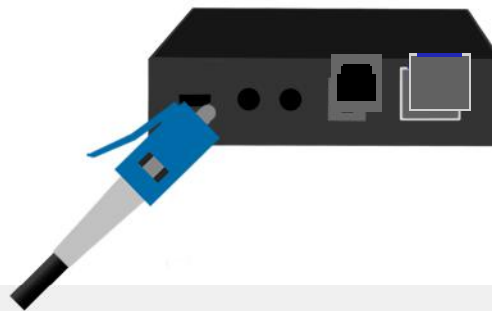

**You can put LC or SC connectors on the Fiber Optic strands in Bullet Train AOC cables to connect to:**

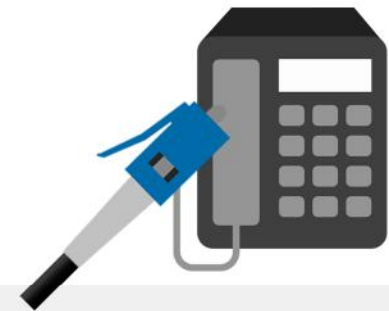

**Fiber Network Switches**

**AV Fiber Extenders**

**Telecommunication**

**Future-proof Video runs with Bullet Train HDMI Cables. Built with**  **CLEERLINE SSF™**
