## Device Top Cover

Device cover is labeled for DIP Switch (EDID setting) and ISP mini USB port

and for easy HDMI port recognition especially useful when Mounting Ears are used for fixation.

 **NOTE: DIP Switch EDID setting index on next page.**

**EDID Settings:** The 5 DIP switches are located on the side of the device, and each switch has two settings, 0 & 1 (UP=0, DOWN=1). The default mode is "00000" which is all up, in this mode the device copies the EDID from the sink (display) plugged into OUTPUT 1. Custom EDID setting below.

## EDID Setting (Notes):

**Note1:** EDID Copy mode: EDID will be copied from sink on OUTPUT

1. The AC-DA12-AUHD is set this way by default for maximum “Plug & Play” Compatibility. If you change sink (Display) plugged into OUTPUT 1, please follow the steps below if you wish to use the new sink’s EDID.

1. Start with power off
2. Set DIP to ‘00000’ (all up).
3. Power on the unit
4. Power on the source device and connect the HDMI input port.

**Note2:** Cascading mode (Ideal for larger installations) Cascade mode does not react to the EDID from the sink device. It sends the signal that you put in, out. This is ideal for linking multiple units together. The method below is an ideal way to use this function effectively.

## To use cascading mode:

1. Start with power off
2. Fix an EDID on the FIRST unit in the series from the list above (4K60, 4K30, 1080P, etc...)
3. Set the DIP on all subsequent units to “11111” (all down).
4. Connect the source device
5. Power up the system
